

Shi (2018) : Convex Polynomial Degradation

$$f_{d,shi} = \sum_i n_i \cdot \Phi(\delta_i) \cdot S_\sigma(\sigma_i) \cdot S_T(T_c) \quad \Phi(\delta) = k_3 \cdot \delta^{k_4}, \quad k_4 > 1$$

$$\Phi_{shi}(\delta) = k_3 \cdot \delta^{k_4}$$
